

Our Yards

SALE REPRESENTATIVE AND
DISTRICT MANAGERS
THE BOAT COMPANY
CHESTER, PA.

The clearest statement, made recently by an industrialist, is worthy of our attention:

"ONLY PEOPLE PAY TAXES"

"I am convinced that the average American citizen has no idea who pays for his government and how much. And the government has not taken much pains to tell him. There is one important truth that people just don't seem to understand. It is this: The government produces nothing. Whatever it spends for people, it must take from people in taxes. More than that, whenever the government gives a service to people, it must at the same time take away from people the right to provide and decide for themselves.

"Furthermore, the government takes from the same people it gives to. Corporations can't pay taxes. Neither can stockholders or garage or hotel or laundry or anyone else who is in business. They can only collect taxes. Only people can pay taxes. And the 'folk' people pay most of them."

(Quoted from a recent newspaper editorial, in their entirety, warning, not to be deceived by John propaganda.)

Let's Not Be Upset By Those Soviet Industrial Miracles!

Why are the Soviet planners (dominating a large part of their industry and liquidating several of the ministries which have hitherto had charge of things) so accustomed here we become to knocking every time Mr. Khrushchev holds a new and bombastic threat that few dare suggest that may be their enterprise is doing better than Communism.

A few months ago Prof. C. Warren Nutter, of the University of Virginia, gave an account, in *E. S. News & World Report*, of an inspection tour of various Russian industrial plants where conditions were obviously far from modern and efficient. Professor Nutter concluded that the plants he

visited were engaged in the production of consumer goods and that Soviet heavy industry might well be more advanced just the same, after forty years of Communism and a great deal of bragging, one might expect a little efficiency to spill over into the stocking and spandex industries.

Anyway, it's time to forget the prophets of gloom, who, instead of wisely refusing to overestimate a trial, hysterically attribute to the Communist system feats which it is highly unlikely to have achieved. Looking so to death is an important item in Soviet planning. By its own, the Soviet *Priglasenie* the Capitalists program seems more likely to succeed than its economic prospects.

SMALL MARITIME NATIONS ARE OVERTAKING UNCLE SAM'S TANKER FLEET

Washington, D.C.—The U.S. tanker fleet is being overtaken by smaller nations, and the U.S. Navy is being forced to buy more tankers to replace those that are being sold or scrapped. The U.S. Navy's fleet of 12 tankers is being replaced by a new fleet of 12 tankers, and the U.S. Navy is being forced to buy more tankers to replace those that are being sold or scrapped.

AUGUST

TEN THOUSAND WORDS

BY WILLIAM WILSON - Staff Writer

The first of the new word processing machines, the IBM Selectric, was introduced at the IBM World's Fair exhibit in New York City last week. The machine is a significant advance in the field of word processing, and is expected to revolutionize the way in which documents are prepared and handled.

The Selectric is a "typewriter" in the traditional sense, but it is also a computer. It can store up to 10,000 characters of text in its memory, and it can retrieve any character at any time. This means that a document can be prepared once and then used over and over again, without the need to retype it each time. This is a major improvement over the traditional typewriter, which requires the user to retype any correction or change.

The Selectric also has a number of other features that make it a very attractive machine. It has a built-in printer, so that the document can be printed directly from the machine. It also has a built-in editor, so that the user can make changes to the document without having to retype it. These features make the Selectric a very convenient and efficient machine for use in a business or office environment.

The Selectric is a very expensive machine, but it is expected to be a major success for IBM. It is a significant advance in the field of word processing, and it is expected to revolutionize the way in which documents are prepared and handled. It is a machine that is well worth the investment.

The Selectric is a very important machine for IBM, and it is expected to be a major success for the company. It is a machine that is well worth the investment, and it is expected to revolutionize the way in which documents are prepared and handled.

Papers written by Sea Ship's Marine Chemist for the Marine Gas Chemist Association will appear from time to time in OIL TANKS in the interest of employee safety. They are of value to all men—particularly those occupied with ship repair.

MISCELLANEOUS HAZARDS OF SHIP REPAIR

By John A. Taylor, Marine Chemist

It is not always recognized that the hazards of ship repair are not limited to the well-known dangers of confined spaces, toxic gases, and fire. There are many other hazards which are often overlooked. These include the use of toxic materials, the presence of sharp objects, the use of heavy machinery, and the presence of electrical hazards. The use of toxic materials is a common hazard in ship repair. Many of the materials used in the repair of ships are highly toxic and can cause serious health problems if inhaled or ingested. These materials include lead, mercury, and various types of solvents. The presence of sharp objects is another hazard. Ship repair often involves the use of tools and machinery which can be very sharp and dangerous. The use of heavy machinery is also a hazard. Many of the machines used in ship repair are very large and powerful, and can cause serious injury if not used properly. Finally, the presence of electrical hazards is a common hazard in ship repair. Many of the machines used in ship repair are powered by electricity, and can cause serious injury if not used properly.

It is important to be aware of these hazards and to take appropriate precautions to avoid them. This includes wearing protective clothing, using proper ventilation, and following safety procedures. It is also important to be aware of the symptoms of poisoning and to seek medical attention if necessary. The use of toxic materials is a common hazard in ship repair. Many of the materials used in the repair of ships are highly toxic and can cause serious health problems if inhaled or ingested. These materials include lead, mercury, and various types of solvents. Red and Gun News

By Mike Janssen

It's a beautiful day in the mountains of Colorado. The sun is shining brightly, and the air is crisp and clear. The mountains are covered in a thick blanket of snow, and the trees are heavily laden with white. It's a perfect day for a hike, and a group of hikers is making their way up a steep, rocky trail. The lead hiker is a young man in a red jacket, and he is looking back over his shoulder at the others. He is smiling and waving, and the others are smiling back. They are all enjoying the view and the fresh air. The hiker in the red jacket is the one who found the red fox. It was a beautiful day, and he was out for a hike. He was looking for a good spot to set a trap, and he found one. He set the trap, and he went home. The next day, he went back to the trap, and he found a red fox. It was a beautiful fox, and he was very happy. He took the fox home, and he kept it. The fox was very friendly, and he loved to play. He was a very good pet, and he was very smart. He was a very special fox, and he was very loved. The hiker in the red jacket was very happy, and he was very proud. He was a very good hiker, and he was very smart. He was a very special hiker, and he was very loved.

**WRAPPING MEDICAL SHIP
PRODUCES ADDITIONAL JOBS
AND INCOME**

By Representative Arthur M. Egan

With the Government's purchase of the ship, the ship is being wrapped in a special material to protect it from the elements. This wrapping process is being carried out by a large number of workers, many of whom are women. The wrapping process is being carried out in a large building in the city of New York. The wrapping process is being carried out in a large building in the city of New York. The wrapping process is being carried out in a large building in the city of New York.

SPORTS FROM WETHERILL

By John Wynn

It is a fact that the school sports program is one of the most popular and important features of the school year. The students are interested in the progress of their own teams and the success of their opponents. The school spirit is high and the students are proud to represent their school in various sports.

The football team has been particularly successful this year, winning several games and setting a new record. The basketball team is also doing well, and the tennis and golf teams are making significant progress. The school is proud to have such talented athletes and coaches.

The school is also sponsoring several other sports, including soccer, volleyball, and swimming. The students are encouraged to participate in these sports and to support their school teams. The school is committed to providing a well-rounded education and to promoting the physical and mental health of its students.

The Mutual Benefit Association is a non-profit organization that provides life insurance and other financial services to its members. It was established in 1911 and has since grown to become one of the largest and most successful mutual benefit associations in the United States.

The association's primary purpose is to provide its members with the highest quality of life insurance and other financial services. It achieves this through its investment in a diverse portfolio of assets, which allows it to offer its members the most competitive rates and the most comprehensive benefits.

RECIPES FOR CANNING . . .

RELIABLE, SIMPLE AND PROVED

HOW TO MAKE THEM AND WHY

1. PREPARE THE VEGETABLES. Wash and trim. Cut into uniform pieces. For example, cut tomatoes into halves, remove the cores, and cut into 1/2-inch slices. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces.

2. PREPARE THE SAUCE. Heat oil in a large saucepan. Add onion, garlic, and celery. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft.

3. PREPARE THE VEGETABLES. Wash and trim. Cut into uniform pieces. For example, cut tomatoes into halves, remove the cores, and cut into 1/2-inch slices. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces.

4. PREPARE THE SAUCE. Heat oil in a large saucepan. Add onion, garlic, and celery. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft.

5. PREPARE THE VEGETABLES. Wash and trim. Cut into uniform pieces. For example, cut tomatoes into halves, remove the cores, and cut into 1/2-inch slices. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces.

6. PREPARE THE SAUCE. Heat oil in a large saucepan. Add onion, garlic, and celery. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft.

7. PREPARE THE VEGETABLES. Wash and trim. Cut into uniform pieces. For example, cut tomatoes into halves, remove the cores, and cut into 1/2-inch slices. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces.

8. PREPARE THE SAUCE. Heat oil in a large saucepan. Add onion, garlic, and celery. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft.

9. PREPARE THE VEGETABLES. Wash and trim. Cut into uniform pieces. For example, cut tomatoes into halves, remove the cores, and cut into 1/2-inch slices. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces.

10. PREPARE THE SAUCE. Heat oil in a large saucepan. Add onion, garlic, and celery. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft.

11. PREPARE THE VEGETABLES. Wash and trim. Cut into uniform pieces. For example, cut tomatoes into halves, remove the cores, and cut into 1/2-inch slices. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces.

12. PREPARE THE SAUCE. Heat oil in a large saucepan. Add onion, garlic, and celery. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft.

13. PREPARE THE VEGETABLES. Wash and trim. Cut into uniform pieces. For example, cut tomatoes into halves, remove the cores, and cut into 1/2-inch slices. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces.

14. PREPARE THE SAUCE. Heat oil in a large saucepan. Add onion, garlic, and celery. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft. Add tomatoes, green beans, green peas, and green peas. Cook until soft.

15. PREPARE THE VEGETABLES. Wash and trim. Cut into uniform pieces. For example, cut tomatoes into halves, remove the cores, and cut into 1/2-inch slices. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces. Cut green beans into 1/2-inch pieces. Cut green peas into 1/2-inch pieces.

SUN'S SHIP BUILDING FACILITIES

A continuous flow of materials from the stock yard of SA provides easy and prompt service and delivery. The layout of the plant, with its numerous buildings, is designed to provide maximum efficiency in the use of the yard. Building under construction will provide the most up-to-date facilities for the shipbuilding industry. The plant is equipped with modern machinery and tools, and is designed to meet the needs of the shipbuilding industry. The plant is also equipped with a large stock yard for the storage of materials. The plant is located in a strategic location, and is easily accessible by road and rail. The plant is a fine example of modern shipbuilding facilities.
