

# *Our Yard*

Just one of the largest ships in Chester's long shipbuilding history.

**SUN SHIPBUILDING & DRY DOCK CO., CHESTER, PA., NOV. 1958**

## PARENTS' PRAYER

O, Master, make me a better parent.

Teach me to understand my children, to listen patiently to what they have to say, and to answer all questions kindly. Keep me from interrupting them, talking back to them and contradicting them. Make me as anxious to them as I would have them be to me. Give me the courage to stand my side against my children and to call them by names, when I know that I have done them a wrong.

May I not vainly heat the feelings of my children. Forbid that I should laugh at their mistakes or resort to shame and ridicule as punishment. Let me not tempt my child to lie and to steal. No; guide me here by love that I may demonstrate by all I say and do that honesty produces happiness.

Before I pray, be merciful to me. May I never be angry, and when I am out of order, help me to hold my tongue.

Lead me to the little virtues of my children and help me to see the good things that they do. Give me a ready word for honest praise.

Help me to grow up with my children, to treat them as would those of their own age, but let me not exact of them the judgment and conversation of adults. Allow me not to rob them of the opportunity to wait upon themselves, to think, to choose and to make decisions.

Forbid that I should ever punish them for my selfish satisfaction. May I grant them all their wishes that are reasonable, and have the courage always to withhold a privilege which I know will do them harm.

Make me as fair and just, as considerate and unselfish to my children, that they will have a greater esteem for me. Fit me to be loved and imitated.

With all Thy gifts, O great Master, give me calm, peace and affection.

## SALES ENGINEERING'S BULKHEAD DOORS FOR MINES

### The Problem

As the mining industry continues to expand, the need for safe and efficient bulkhead doors is becoming increasingly apparent. These doors are essential for separating different sections of a mine, preventing the spread of fire, gas, and water. The design and construction of these doors must be carefully considered to ensure they can withstand the high pressures and temperatures encountered in a mining environment. Sales Engineering's bulkhead doors are designed to meet these challenges, providing a reliable and durable solution for mine operators.

The design of a bulkhead door is a complex task that involves a deep understanding of the mining environment and the specific requirements of the application. Sales Engineering's engineers work closely with mine operators to identify the unique challenges of each project and develop a custom solution. This process involves a thorough analysis of the mine's layout, the types of hazards present, and the expected operating conditions. The resulting bulkhead door is designed to provide maximum safety and efficiency, ensuring that the mine can continue to operate safely and productively.

## GOSIP AFTER RETIREMENT

By "Gossip" Bob

It is a well-known fact that the most interesting gossip is that which is spread by those who have retired from the service. The reason for this is that they have had a long and varied experience in the service and are therefore able to tell of many interesting incidents and events. They are also able to tell of the many changes that have taken place in the service since they were last in the line.

One of the most interesting pieces of gossip that I have heard of late is that of a certain officer who had been in the service for many years. He had been in the service during the war and had seen many things. He had also been in the service during the peace and had seen many things. He had been in the service during the war and had seen many things.

He had been in the service during the war and had seen many things. He had also been in the service during the peace and had seen many things. He had been in the service during the war and had seen many things. He had also been in the service during the peace and had seen many things.
