

OUR YARD

CHRISTMAS holds a great meaning for most of us. Today, along with our responsibility to have our children hear His message, we parents need to see that they celebrate Christmas safely. Notice the features on our January page this month.

In order to see that all children — including our own — will be as loved for the holidays, read the appeal below. Safety first in cars or buses, will mean **HAPPY HOLIDAYS**.

Don't Hurt My Little Girl

Today my daughter, who is 7 years old, started to school as usual. She wore a dark blue dress with a white collar. She had on black shoes and wore blue gloves. Her teacher spanked, whose name is Cox, sat on the front porch and whined his canine belief in the belly of other nations as she waved goodbye and started off to the hall of learning.

Tonight we talked about school. She told me about the girl who sits in front of her, the girl with yellow curls, and the boy across the aisle who makes funny faces. She told me about her teacher, who has eyes in the back of her head, and about the trees in the school yard, and about the big girl who doesn't believe in Santa Claus. We talked about a lot of things . . . tremendously vital, unimportant things, and then we studied spelling, reading, arithmetic . . . and then to bed.

She's back there . . . back in the nursery sound asleep, with "Princess Elizabeth" (that's a doll) cradled in her right arm. You guys wouldn't hurt her, would you? You see, I'm her daddy. When her doll is broken or her finger is cut or her head gets bumped, I can fix it . . . but when she starts to school, when she walks across the street, then she's on your hands.

She's a nice kid. She can run like a deer and dash about like a chipmunk. She likes to ride horses and roller and hike with me on Sunday afternoons. But I can't be with her all the time; I have to work to pay for her clothes and education. So please help me to look out for her. Please drive slowly past the schools and intersections . . . and please remember that children run from behind-picked cars.

Please don't run over my little girl.

Red and Gun News

By "Red" Clark Illustrations by Richard Dean Parks

THE "RED" CLARK, author of "Red and Gun News," is a well-known sports writer and outdoorsman. He has written extensively on hunting, fishing, and outdoor sports. His work is characterized by a deep knowledge of the outdoors and a keen eye for detail. In this issue, he discusses the importance of conservation and the role of the outdoorsman in maintaining a healthy environment. He also shares his experiences and tips for various outdoor activities, including fishing and hunting. The article is written in a conversational and engaging style, making it accessible to a wide range of readers. The illustrations by Richard Dean Parks are simple and effective, capturing the essence of the scenes described in the text. The overall layout of the page is clean and professional, with a clear focus on the text and illustrations.

The dog in the photograph is a pointer, a breed known for its distinctive speckled coat and upright ears. It is standing in a field, looking towards the camera. The background is slightly out of focus, showing some trees and a fence. The lighting is natural, suggesting an outdoor setting during the day. The dog's posture is alert and attentive, typical of the breed.

The background is slightly out of focus, showing some trees and a fence. The lighting is natural, suggesting an outdoor setting during the day. The dog's posture is alert and attentive, typical of the breed.

SPORTS

The sports section of the magazine covers a variety of outdoor activities, including fishing, hunting, and hiking. The articles provide practical advice and tips for readers interested in these activities. For example, one article discusses the best times of day to go fishing, while another offers suggestions for choosing hunting gear. The writing is informative and easy to follow, making it a valuable resource for outdoor enthusiasts. The section also includes some news items and updates on local sports events. The overall tone is positive and encouraging, promoting a healthy and active lifestyle. The illustrations accompanying the text are simple and effective, helping to illustrate the points being made in the articles.

A person sitting in a small boat on a body of water.

MUSIC

Music has always been an important part of our lives. It is a language that speaks to the soul and brings joy to the heart. In our school, we have a music program that is designed to help students develop their musical skills and appreciate the beauty of music.

The music program at our school is a vital part of our curriculum. It provides students with a unique opportunity to explore the world of music and express their creativity. Through music, students learn to work together, share their talents, and enjoy the process of learning. Our music teachers are dedicated to providing a high-quality education and ensuring that every student has the chance to succeed.

Music is a powerful force that can transform lives. It has the ability to bring people together and create a sense of community. In our school, we have a music program that is designed to help students develop their musical skills and appreciate the beauty of music. Through music, students learn to work together, share their talents, and enjoy the process of learning. Our music teachers are dedicated to providing a high-quality education and ensuring that every student has the chance to succeed.

OUR YARD

GOSSIP AFTER RETIREMENT

By "Woodell" Bunker

As the oldies in the clubhouse get together, they talk about the old days. They talk about the good times and the bad times. They talk about the people they met and the people they lost. They talk about the things they did and the things they didn't do. They talk about the life they lived and the life they want to live now.

They talk about the old days when they were young and full of life. They talk about the days when they were in love and when they were in trouble. They talk about the days when they were happy and when they were sad. They talk about the days when they were free and when they were not.

They talk about the old days when they were young and full of life. They talk about the days when they were in love and when they were in trouble. They talk about the days when they were happy and when they were sad. They talk about the days when they were free and when they were not.

They talk about the old days when they were young and full of life. They talk about the days when they were in love and when they were in trouble. They talk about the days when they were happy and when they were sad. They talk about the days when they were free and when they were not.

the city's industrial base. The steel industry, which has been the backbone of the city's economy since the late 19th century, is still a major employer. However, the city has also seen a significant increase in its service and retail sectors. The downtown area, which was once a hub of activity, has seen a resurgence in recent years. The city's population has grown steadily, and it is now one of the largest cities in the state. The city's infrastructure has improved significantly, and it is now a more attractive place to live and work. The city's economy is diversifying, and it is becoming more resilient to economic downturns. The city's future is bright, and it is well-positioned to continue to grow and prosper.

The city's industrial base is still a major employer, but it is also a source of environmental concern. The steel industry has been a major contributor to air pollution in the city, and this has led to a number of health problems. The city has taken steps to reduce air pollution, but more needs to be done. The city's government is working to attract new industries and to create more jobs. The city's economy is diversifying, and it is becoming more resilient to economic downturns. The city's future is bright, and it is well-positioned to continue to grow and prosper.

By Mary Quinn

It is a fact that the average person in this country is not well informed as to the conditions in the various parts of the world. The news is so full of reports of battles and deaths that it is difficult to get a clear picture of the situation. It is true that the news is full of reports of battles and deaths, but it is also full of reports of the suffering of the people in the various parts of the world. It is true that the news is full of reports of battles and deaths, but it is also full of reports of the suffering of the people in the various parts of the world.

THE ELECTRICAL INDUSTRY HAS BEEN THROUGH a rough time in the past few years. The industry has been hit hard by the recession, and many electrical contractors have had to close their doors. However, the industry is beginning to show signs of recovery, and many contractors are optimistic about the future. One of the reasons for this optimism is the fact that the electrical industry is a vital part of our economy. It provides the power that runs our homes, businesses, and industries. Without electricity, our lives would be a lot different. Therefore, it is important for us to continue to invest in the electrical industry and to support our electrical contractors. This is especially true in light of the fact that the electrical industry is one of the most innovative and dynamic industries in our economy. It is constantly evolving and adapting to new technologies and challenges. This makes it a very exciting and rewarding industry to work in. So, if you are considering a career in the electrical industry, now is a great time to do so. There are many opportunities available, and the industry is looking for skilled and motivated professionals. So, get out there and start your own electrical business today!

JOHN K. RUPPBERG is a member of the National Electrical Contractors Association and the International Brotherhood of Electrical Workers. He is currently a member of the local union in his area.
