SUN SHIPBUILDING & DRY DOCK CO., CHESTER, PA., JULY 1962

Memo from John G. Paw, Jr.

Beware of Some 'Benefactors'

According to the old saw, you should not put all your eggs into one basket. I want to warn
it around a little to something like not putting all your debts into one basket.

Information has come from the director of the local Chamber of Commerce that some com-
panies in the home improvement business are coming up with a new catch-all offer to cancel
indefinite numerous small debts of a family to be paid off as part of a home improvement contract.

It works on this order: a family owes money to ten or a dozen different places. It all may
total \$1,000. To pay a little on each every month takes more money than is available so some
always are in arrears. The company offers to pay off these debts if the family will contract for
\$1,000 say, in home improvements. Only \$500 of the work will be done now with the \$1,000 being
used to pay the debts. That one payment a month sounds good and the family agrees. This is what
they find:

A \$1,000 debt is not of the small debt class as a lien is filed against the property.

Interest and service charges for the consolidated debt are more than they paid on ALL the
previous debts.

Now the entire amount must be paid each month. They can't let you date this month and
another next month to keep all happy.

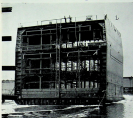

Financing is through an out-of-state bank they cannot reach, but which certainly will reach
them if they do not pay.

They now are tied up for an additional \$1,000 in the home improvement contract.

If anyone approaches you with such a proposition it would be wise to discuss the propo-
sition with someone at your bank if you have an account, or go to the Delaware County Chamber
of Commerce where you will get sound advice before you commit yourself.

PERIOD OF APPRENTICESHIP probably covers longer years in a man's life. But he doesn't realize it until they are passed on it barely realize any time at all until Frank is 40. He started up full to local oil companies. When he is getting from Superintendent Frank, then, it is good that he made it. At least that's what they—perhaps you had better not ask Frank about it.

TRUCKS HAVE BEEN BORN in long distance heavy-duty type of job for some weeks. This is late in afternoon on the line parking up. About 7:30, they will take off and after that other the Harwin bridge site on the line. After being unloaded they return to Westfall where they will take on another load and go to parking lot to wait for 2:30, again. Loads are either bars for bridge and weigh between 15 and 25 tons (loads can carry eight smaller bars or seven larger ones). By now these bars will be delivered and trucks are hauling other parts which are used.

Dr. Robert "Whitey" White WHAT WAS I THINKING BY THE SPRINGBROOK TRAIL?

Dr. White

When you go into the woods Spring Creek you are not just out there to catch trout and the excitement of the chase. You are also out there to enjoy the beauty of the land around you. Let's Not Forget

SUN SHIP has what it takes to build

for INDUSTRY

With all kinds of building complete machines and special equipment for use in a wide range of industries, Sun Ship has large and small equipment shops having produced items ranging from small tanks to large horizontal, vertical, pressure vessels, mills, plate work and special-purpose machinery for the chemical, petroleum and other industries.

Picture here are a lathe-like press, which was stopped by rail, and a manufacturing vessel ready for loading on a barge for shipment by water to its oil

terminal. They are just two examples of the equipment Sun Ship manufactures in many fields, and examples of our shipping facilities.

Because we serve all the Continents, we build all equipment right in our own plant, without subcontracting. Our permanent location on the Delaware River, with direct access to rail and water to all ports, insures speedy delivery.

Let Sun Ship solve your machine or equipment problem. Write or visit our Sales Engineering Department.
